

## EVOLUX EYES & LIPS

The cosmetics industry was waiting for it, now Valois offers it!

The world's leading designer and manufacturer of spraying and distribution systems will present **EVOLUX Eyes & Lips**, its **first cosmetic pump specifically designed for eye and lip contours**, at Luxe Pack New York on 21 and 22 May.

In 2007 the number of eye contour product launches boomed on the increasingly upscale selective care market. For the first time, Valois's Beauty & Home division, wanting to keep pace with the brands' growth, is offering a cosmetics pump exclusively designed for local eye and lip contour treatments: **EVOLUX Eyes & Lips**.

**Two words sum up this new breakthrough's innovativeness: micro-dose, maxi-precision.**

EVOLUX Eyes & Lips features a high-precision tip that dispenses 70 µl doses, ideal for highly targeted applications.

But EVOLUX Eyes & Lips offers much more than that:

- **absolute respect for the most fragile formulas:** thanks to the Alpha motor by Pfeiffer, guaranteed metal-free,
- **impeccable finishes come in versions for every style and market:** a metal or plastic pump, gold/silver metal or PP cap,
- **and practicality:** its cap is delivered on, for greater user friendliness.

The pump, which is to be assembled on low-content (15, 20 or 30 ml), glass or plastic bottles, will be available in late 2008.

Valois S.A.S., which was founded in 1947, is the world leading designer and manufacturer of spraying and distribution systems for the pharmaceutical, perfume and cosmetics markets.  
Valois S.A.S is a subsidiary of the Chicago-based Aptar Group.  
Aptar shares are listed on the NYSE under the acronym ATR.
